

# DURABRI® IN N/B

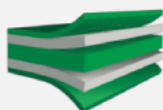

## DESCRIPTION

This bicolored multilayer film is produced with the use of the latest generation polymers and environmentally friendly color masterbatches, that give the product superior strength, complete opacity and vivid coloration. **DURABRI® IN** also offers unique flexibility. These features combined with its reduced weight assist the application on the structures.

## APPLICATION

This film has been especially developed to be used as an internal layer for insulated cattle sheds. Any direct contact with the sunlight has to be avoided. **DURABRI® IN** ensures long time, total protection of machinery, supplies, fodder or livestock.

KEY FEATURES	SPECIFICATIONS	UNITS	NOMINAL VALUES	ACCORDING TO
	<b>Thickness (average)</b> <b>Thickness (at any)</b>	$\mu\text{m}$ $\mu\text{m}$	<b>140</b> $\pm$ 5% <b>140</b> -15%	NF EN 13206 NF EN 13206
	<b>Width</b>	m	$< 7,25 \pm 2\%$ $\geq 7,25 -0 +4\%$	ISO 4592 ISO 4592
	<b>Color</b>	-	<b>BLACK / WHITE</b>	-
	<b>Elongation at break (MD)</b>	%	<b>550</b> -10%	ISO 527-3
	<b>Tensile at break (MD)</b>	MPa	<b>27</b> -10%	ISO 527-3
	<b>Elongation at break (TD)</b>	%	<b>600</b> -10%	ISO 527-3

## DURABRI® IN N/B

**multilayer**

A multilayer film allows the insertion of additives in order to improve the mechanical and optical properties. With a multilayer film, it is possible to have an asymmetrical structure, allowing the combination of different materials advantages in order to ensure efficiency whatever the weather or crop specificities.

**Super tough**

The film contains special high-strength polymers which provide excellent mechanical strength. It offers additional safety in areas with very strong winds and heavy rains.

**Durability**

Our films are guaranteed for several seasons, depending on each case. The usual conditions of laying and use are available from Agripolyane and its distributors.
